## PH FORMULA RESURFACING PEELS

### AGE

Active and effective skin resurfacing treatment for typical signs of ageing, i.e. photo-ageing, pigment changes, dull sallow appearance, superficial and medium expression lines.

**R950\***

### MELA

The unique pHformula powerclay formula used in the M.E.L.A. resurfacing treatments is a powerful hyperpigmentation treatment designed to reduce the accumulation of epidermally located melanin. It effectively inhibits the enzymatic activity of tyrosinase, whilst stimulating epidermal differentiation and therefore accelerates epidermal cellular turnover causing the removal of already formed melanin pigment. Due to the innovative highly effective mode of action, significant visible results are obtained with minimal risk.

**R1 350\***

### ACNE

The unique combination of actives in the pHformula A.C. solutions, specifically formulated to correct the main acneic manifestations such as comedones, papules and pustules. It was designed to act on the 4 factors that trigger acne.

1. Seborrhoea
2. Hyperkeratinisation
3. Microbial colonization (P acnes)
4. Inflammation

**R850\***

## COMPLETE RESTORATION TREATMENT

## DERMAPEN

(Medical skin needling treatment)

Medical Dermapen treats Fine lines, Wrinkles, Enlarged pores, Surgical and Acne Scarring, Ageing skin, Skin Tightening, Smokers lines, Sun damaged skin, rough coarse texture, skin, Product penetration.

The needle penetration into the dermis causes micro injuries. The area is flushed with blood containing growth factors and healing messengers as well as enzymes to prepare for healing. These enzymes have the ability to breakdown old and irrationally positioned collagen and debris which impairs the fibroblast activity. The removal of this debris, combined with growth factor stimulation will then mobilize the fibroblasts to manufacture more Extra Cellular Matrix (Collagen, Elastin and Gags) and off course will increase the production of new Fibroblasts. In this way the skin goes through a whole restructuring process and the client is left with less signs of ageing and in the case of scarring the scar will improve radically.

Treatment includes a Hyaluronic serum and Growth Factor Mask sheet.

**Recommended 1 x Month for 6 treatments and there after 1 x every 3 months for ongoing Collagen stimulation.**

**R1 250** per treatment

NuContour **R200** per injection

## MEDICAL WEIGHTLOSS

### RESHAPE

Dr Heyns' Reshape program is a weight loss program that primarily focuses on fat loss. By using Lipolytic in combination with a very low calorie diet you will lose up to 30% more abnormally stored fat as opposed to a reduced calorie diet on its own.

Lipolytic is a natural product that will trigger lipolysis (breaking down fat) and blocking lipogenesis (absorbing energy into fat cells) if combined with a reduced calorie diet.

The combination of the medication and the specially formulated eating plan will trigger the body to tap into your abnormal fat stores as a source of energy. By tapping into your fat reserves you will release a substance called Leptin that will trigger your satiety centre in your brain and give you a feeling of "fullness".

Lipolytic also increases your **serotonin** (happy hormone) levels thus increasing your mood.

Result:

- weight loss (fat loss)
- increased energy levels
- decreased hunger
- increase in mood

Because it's a natural product it is safe and has no side effects, however you have to see your doctor to rule out any medical cause for your weight problem.
